Below is the list of Integration Runtime (Self-hosted) Nodes:
SHIR-Adithya-Onprem
WIN-K1R6MTK0V07 : Current New Node
Enable remote access from intranet
Finish
Cancel
Please enable 'Remote access from intranet' on the first node to enable 'High Availability and Scalability'.
You may select TLS/SSL certificates on each node to setup encrypted communication channel across nodes.
You can enable this communication channel without SSL/ TLS certificate as well if your network environment is trusted by enabling 'Remote access from intranet without certificates' on each node.

Manage keys and secrets used by apps and services
Our recommendation is to use a vault per application per environment (Development, Pre-Production and Production). This helps you to not share secrets across environments and also reduces the threat in case of a breach.
